HTML, CSS, Javascript, Typescript, Lua, C, NodeJs, React, Express, NextJs, GraphQL, Git, SQL, Redis, Linux, Bash

PROJECTS

🔗 Multiplayer Sudoku

An online multiplayer sudoku game

- Display an interactive sudoku grid in the browser.
- Allow players to share a game invite link.
- Manage updates between clients and server using the WebSocket technology.

🔗 Blog

My blog with an online editor

- Display articles.
- Build an API using GraphQL to handle CRUD operations on articles.
- Implement 2FA (Two-Factor Authentication) to allow the admin to connect to the editor.
- Manage editing authorizations.
- Use ISR (Incremental Static Regeneration) with NextJs (v12) to speed up page loading.

🔗 Surf Forecast

Group project for "la nuit de l'info" 2020 edition

- Coordinate a team.
- Setup a server.
- Use an existing API to consume its data.
- Display the retrieved data on a web page.

🔗 2D Map Editor

2D map editing tool for game development

- Create an interface and handle inputs.
- Import and export maps in multiple formats.
- Manage map editing (fill, resize...).
